FOREWORD.

The unique and the varied collections of rare Sanskrit manuscripts, housed in the Bikaner Fort and now named the Anup Sanskrit Library after Maharaja Anup Singhji, came first to public notice through the catalogue prepared by Dr. Rajendralal Mitra in 1880 and published under the authority of the Government of India. Even though that catalogue noted only 1700 volumes (out of over 10,000) and described only 150, the importance of the collection came to be recognised by scholars all over the world. When the library came under my general direction in 1939 as the Minister in charge of Education, I realised, on a casual examination of the catalogue, that it was not only incomplete, but incorrect in regard to many entries. This was extremely surprising in view of the high reputation that Dr. Rajendralal Mitra enjoyed as one of the most eminent Indianist scholors of his day. As stated in the introduction to that volume Dr. Mitra had himself never visited the library, but had merely compiled a catalogue out of the information supplied to him by Harischandra Sastri. The extent of inaccuracies in that catalogue may be judged from the following instances which came to my notice at the time.

On page 235, Karnavatamsa of Hoshinga Krishna Bhatta is noticed as a poem on the birth and exploits of Karna, the Mahabharata hero, while actually the book is named after the Maharaja Karan Singhji of Bikaner, who patronised the poet.

On page 111, Madhava's commentary on the Sama Veda is noticed as an anonymous dissertation on the hymns of the Sama Veda.

On page 271, Padamanjari Kusuma Vikasa is wrongly described as Padamanjari.

Realising the value of the collection and the large number of previously unknown manuscripts in it, His late Highness Maharaja Ganga Singhji Bahadur accepted my recommendation that the library should be reorganised, and that the preparation of a new and accurate catalogue should be undertaken. For this purpose, the Government invited the assistance of Prof. C. Kunhan Raja, M.A., D.Phil.,(Oxon), who, as the editor of the New Catalogues Catalogorum of the Sanskrit manuscripts, seemed fitted in every way to undertake the task. Under his expert direction, the library was reorganised and the work of editing the Ganga Oriental Series was put on a satisfactory footing. The more difficult task of preparing a complete and accurate catalogue on a scientific basis has also now been completed. The first fasciculus, which contains a list of Vedic manuscripts along with Itihasas, Puranas and a part of the Gita, is now presented to the public.

I wish to record here the appreciation of the Government of the extremely valuable work done by Prof. Kunhan Raja and his co-editor, Mr. K. Madhava Krishna Sarma, the Curator of the library, who has been in charge of the actual work in Bikaner.

I feel confident that this catalogue will receive a ready welcome at the hands of Sanskrit scholars and others interested in the ancient literature of India.

K.M. PANIKKAR.

Dr. Urmila Sharma Collection, Varanasi

CC0. In Public Domain, Digitizagtion by eGangotri

Preface.

On the 10th April, 1939 an announcement was made from the office of the Prime Minister of the Bikaner State stating that the rich collection of manuscripts deposited in the Fort at Bikaner has been thrown open to the public for research work and that the State would start a Serial publication for which a liberal grant was made. Soon after that, the Minister of Education wrote to me asking me if I could undertake the arrangement of the manuscripts in proper order and prepare a catalogue. I was very happy to receive the offer and undertook the work.

At that time, the University of Madras had undertaken the preparation of a "New Catalogus Catalogorum" of Sanskrit manuscripts, making the Catalogus Catalogorum of the Aufrecht up-to-date. For the Bikaner Library there was an old Catalogue prepared by the late Rajendralal Mitra in 1880. This Catalogue was not complete, in so far as it noticed only about 1700 manuscripts; even of this number only 150 were fully described; for the others there was only a list. Rajendralal Mitra had not himself seen the Library; the Catalogue was compiled out of some slips prepared by Harischandra Sastri.

In the winter of 1929-30 I had an opportunity to visit the Library myself and to examine the rich collection. I found that there were many works in the collection which were not noticed in the printed catalogue. There was a hand-written list for the whole collection. But the collection itself was not classified. The manuscripts were kept in cloth bundles, each such bundle containing many manuscripts on various subjects, and the principle underlying the grouping of the manuscripts being the size of the manuscripts.

I felt that such a rich collection of manuscripts should be included in the "New Catalogus Catalogorum" proposed to be prepared by the University of Madras, of which I was appointed editor in 1938, and so I undertook the work of properly arranging the manuscripts classified on a subject basis. I visited Bikaner in February-March 1940 and started the work. All the manuscripts were sorted out, each work being packed separately in brown paper and kept between two thick card boards and tied up securely. The manuscripts were then given a serial number, after they were classified and arranged according to the subjects. The name of the work, the name of the author, the subject, the number of folia and the serial number were all noted on a label affixed to each work.

I finished the preliminary arrangement in my second visit in May-June 1941. Based on this arrangement, a provisional list was prepared by the Library staff for the entire collection. Mr. Rama Nivas Harit and Mr. Megha Raja Goswami were on the staff of the Library when I first visited the Library in 1940. Mr. Rawatmal Saraswat was also appointed in the summer of 1941. The provisional list was prepared by them. Towards the end of 1941, Mr. K. Madhava Krishna Sarma, M.O.L., was appointed as Curator of the Library. A plan for the publication of the catalogue had already been prepared; but the preparation of the final copy for the Press after carefully checking the manuscripts, was started only after Mr. Sarma took charge of the post. He was a Research Student under me in the Madras University, and later he was on the staff of the Adyar Library, preparing the Descriptive Catalogue of the Library under my supervision. He had, by the time he was appointed in the Anup Sanskrit Library, finished the volume for the Vedic works, and that volume had already been printed. Thus he came to the Library with considera[illegible] experience in handling and cataloguing manuscripts.

Dr. Urmila Sharma Collection, Varanasi

CC0. In Public Domain, Digitizagtion by eGangotri

He closely scrutinised every manuscript before the work was entered in the Catalogue for printing, noting the various details. The portion printed is now issued as the first fasciculus containing one hundred pages. It contains the Samhitas, Brahmanas, Upnishads and Vedangas, the Itihasas, the Puranas and a part of the Gita. It is proposed to issue the subsequent portions in similar fasciculi, of one hundred pages. A detailed introduction, indices of authors, works etc., and such other supplementary matter will be added when the whole catalogue is ready, which it is hoped, will not be very long from now. The catalogue is being issued in instalments, so that scholars can be in possession of the information about this very important Library as soon as substantial portion is available, instead of holding up the entire information till the whole catalogue will be ready.

The catalogue is only a classified list. All relevent details are given in columns. In the first column there is the General number of the manuscripts. This starts from I and goes to the last number in the entire collection. The second column contains the serial number, which is separately given for each subject heading. In this way readers can know at a glance how many manuscripts there are in the Library under each subject. Thus there are 122 manuscripts under the subject of Rigveda. In giving the general number in the first column, only the first two digits are given; the full number for the beginning of the left hand pages and for the ending of the right hand pages are given on the top of the respective pages.

In the third and fourth columns the name of the work and of the author are given, and the number of folia in the manuscripts is noted in the fifth column. The date of the manuscript is entered in the sixth column and the owner's name is given in the seventh column. Many of the manuscripts were acquired from private persons and many were copied for the Library under the orders of the Maharajas. If the scribe's name is noted in the manuscript, it is given in this seventh column with the letter S following. Further details are entered in the last and eighth column.

In the case of most of the manuscripts, more details than this are not required, and so it is not proposed to prepare a descriptive catalogue for the entire collection. The descriptions given in the classified list is quite enough. In the case of the rare manuscripts, where further descriptions are required, a supplementary volume containing such detailed descriptions will be prepared and issued after the list is completed.

My part in preparing this catalogue is confined to having first arranged the manuscripts in a definite order and having noted the various details on the manuscripts themselves. The list was prepared from the entries noted on the manuscripts by myself or by the members of the staff of the Library under the plan which I had prepared. The preliminary list was checked by me and when the final list was prepared by the Curator, I was in constant touch with his work. The final scrutiny and checking was done by the Curator and the catalogue was seen through the Press by him.

The catalogue was planned when Major K.M. Panikkar was the Minister of Education in Bikaner. Later he became the Prime Minister. His constant encouragement was always a very strong factor in the progress made in the matter of publishing the catalogue. The Government Press has done their part of the work quite satisfactorily. The Government Press had not taken up any literary publications before. It was when the Library started its publication activities that the Press had to take up this sort of literary work, in addition to the heavy work which they had already to turn out. The get-up and the printing will do credit to any publishing firm with many years of experience in such publications before them. In the

matter of the neatness of printing and general appearance, there is nothing to be desired. Pandit Shri Ram, the Superintendent of the Government Press, deserves both thanks and congratulation for the excellent way in which he has been able to print the catalogue so very expeditiously.

Mr. Madhava Krishna Sarma, the Curator, has spared no pains in making the catalogue accurate and thorough. He has done his work quite expeditiously, without sacrificing correctness of entries and fallness of details. Besides dedicating his knowledge and experience for this work, he has taken a keen personal interest in this task. He had to overcome many difficulties, since the Library is yet in its infancy and is not sufficiently equipped for research of such a technical nature. He deserves full credit for bringing out this part of the catalogue in such a short time.

University of Madras
12th December 1944

C. KUNHAN RAJA.

In his Preface Prof. C. Kunhan Raja has dealt with the recent reorganisation of this Library and the scheme for a complete catalogue. It now remains for me to acknowledge my indebtedness to Major K.M. Panikkar, Prime Minister, Bikaner, and Prof. Raja, who gives his advice to the Anup Sanskrit Library.

In spite of his busy occupation Major Panikkar was all kindness to me whenever I approached him for guidance. He has given the Library the necessary strength and courage to steer clear of the difficulties which an institution faces in its initial stages.

My indebtedness to my Guru Prof. Raja is very heavy indeed. I have been associated with him for over a decade now, and it is to the training received under him that I now owe the privilege of associating myself with this catalogue. As in the case of the catalogue of the Library, in the preparation of this also I have consulted him at all stages. The experience gained in the preparation of the former stood me in good stead especially when this Library was not sufficiently equipped for technical research. The association of a scholar of Prof. Raja's eminence is a great source of encouragement to the Library which owes to him much for its present state.
